

**"...and did you hear about the Bangkok Cats? Most of them are dying, but... some of them are using tools."**

A new, chewable nanotechnology lets people take pictures with their eyes and cures cancer.

But the early adopters find out it's hard to uninstall something after it's spread through their bloodstream...

**Special Advance Screening** sponsored by  
celtx.com, projectwonderful.com and theculturalgutter.com

**Friday May 18th, 7pm, Innis Town Hall**

(2 Sussex Ave., U of T, 1 block south of St. George Station)

**\$5**
